

Subject Description Form

Subject Code	ITC6975RT
Subject Title	Guided Study in Green Production Research in Fashion Supply Chain Management
Credit Value	3
Level	6
Pre-requisite/Co-requisite/Exclusion	Pre-requisite: Background in business and management
Objectives	To examine the latest development of the green production, environmental management, health and safety related researches in fashion supply chain. To explore the literature of green and sustainable production in fashion supply chain management. To study the related environmental management concepts in operations management and its linkage to financial performance. To develop an analytical review on green production and social responsibility literature in the context of fashion supply chain.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: - The student will be able to propose the research gap and avenue of future research on this topic. - The student will also be able to apply relevant management theories and research frameworks in the green production and corporate social responsibility related researches. - The student will be able to conduct citation network analysis of the topic.
Subject Synopsis/ Indicative Syllabus	- Reviews of recent sustainability research related to production - Introduction of keyword searches strategy for green technology, green production, sustainable operations - Citation network analysis - Main path analysis - Structures of systematic review of green and sustainable operations literature - Theoretical contributions and discussion for green and sustainable operations literature
Teaching/Learning Methodology	Students are required to attend tutorials, read assigned research papers, and submit a written report on an assigned research topic.

Assessment Methods in Alignment with Intended Learning Outcomes	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)					
			a	b	c			
	1. Assignment	30%	✓	✓				
	2. Examination	70%	✓	✓	✓			
	Total	100%						
Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: Assignment is designed and used to train and assess students’ knowledge and skills learned in this subject. Examination will be used to assess students’ overall intended learning outcomes.								
Student Study Effort Expected	Class contact:							
	▪ Tutorials/Consultation					26 Hrs.		
	Other student study effort:							
	▪ Reading papers					47 Hrs.		
	▪ Preparing assignments and report					60 Hrs.		
	Total student study effort					133 Hrs.
