

Subject Description Form

Subject Code	SFT206FY
Subject Title	Colour, Fashion Trends and History
Credit Value	3
Level	2
Pre-requisite/ Co-requisite/ Exclusion	Exclusion: ITC3011D Colour and Fashion Trends
Objectives	The subject introduces the development of historical fashion dress and its relationship to the development of contemporary fashion. It provides general knowledge of colour, its application in relation to the evolution of fashion trends and its impact on the fashion business. It explores how global issues bring about colour and fashion trends and how these are translated into fashion.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: (a) demonstrate an understanding of the influences of history, arts, socio-cultural, economic and other factors on contemporary fashion; (b) develop a critical and analytical perspective regarding the formulation and development of colour and fashion trends; (c) apply the theories and principles of colour and fashion trends in response to socio-cultural diversity; (d) translate global macro trends into concepts relevant to contemporary fashion; and (e) communicate clearly and effectively in a professional manner.
Subject Synopsis/ Indicative Syllabus	(I) Key moments in fashion history that led to major shifts in fashion trends. (II) Key movements in 20th century art and design and their influence on fashion. (III) The principles and the application of colour combinations and proportions in global fashion and textile markets. (IV) The description and commercial application of colour order systems and the international system of colour specification.

	(V) The analysis of the components of fashion trends, and techniques of fashion trend forecasting. (VI) The analysis of different types of commercial forecasters and complementary suppliers of colour and fashion trend information, and techniques used for forecasting.
Teaching/Learning Methodology	Lectures will be structured to convey theories and concepts with specific reference to the current global fashion context. Tutorials will be designed to deepen the knowledge delivered in the lectures and to provide the environment for more interactive discussion. External speakers will be invited whenever appropriate. Group assignment/individual presentations, case studies and reflective writing will be employed as the assessment tools for critical thinking, team working and communication skills.

Assessment Methods in Alignment with Intended Learning Outcomes	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)				
			a	b	c	d	e
	Continuous Assessment	100%	✓	✓	✓	✓	✓
	<i>1. Group assignment</i>	<i>60%</i>	✓	✓	✓	✓	✓
	<i>2. Coursework</i>	<i>40%</i>	✓	✓	✓	✓	✓
	Examination	0%					
	Total	100%					
Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: The group assignment will enable students to engage in research and analysis, team work and negotiation, and mirrors authentic industry practice whilst developing higher order cognitive skills such as critical thinking and problem solving. The individual reflection will enable students to consider their own progress, their contribution to the project, and ability to develop as reflective, independent learners.							
The materials submitted for all assessment must be the student's own work. The submitted work may not be accepted for the purpose of assessment if its authenticity is questionable. However, students could utilise various media and technologies such as GenAI to assist with design research in the preliminary stage. They are required to declare the use of GenAI in their work if applicable. Submitting GenAI-generated materials as students' own work or part of their work without declaration is an act of academic dishonesty. Students who are found committing academic dishonesty will face disciplinary actions.							

Student Study Effort Expected	Class contact:	
	▪ Lecture	26 Hrs.
	▪ Tutorial	12 Hrs.
	Other student study effort:	
	▪ Projects	67 Hrs.
	Total student study effort	105 Hrs.
