

Subject Description Form

Subject Code	SFT341E
Subject Title	Fashion Merchandising and Production
Credit Value	3
Level	3
Pre-requisite/ Co-requisite/ Exclusion	
Objectives	The subject provides a thorough understanding of the planning, sourcing and control processes in bulk orders, as well as the technical knowledge of the production processes of fashion products and their respective quality problems during manufacturing.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: (a) manage the merchandising process and communication activities in fashion business (b) analyse and develop technical criteria and requirements of fashion products for bulk orders, including trims and accessories (c) manage, apply and evaluate the production planning and control processes in apparel manufacturing, production efficiency, quality and costing of apparel products; (d) demonstrate an integrated and critical approach to the merchandising and production processes so as to solve problems in merchandising and achieve the required quality standards within an ever changing international and local market environment.
Subject Synopsis/ Indicative Syllabus	(I) Merchandising Processes in Fashion Business Principal operations and processes in fashion merchandising. Evaluation of fashion products, key processes and workflow. Analysis of the quality, costs and specifications and measurements of fashion products, including types and quality of trims, threads, and accessories to facilitate the communication with different stakeholders. (II) Apparel Production Processes Principal processes in the mass production of apparel

	products and evaluation of material usage / wastage calculation. Sequence of assembly and flow of operations for various types of apparel products in production planning and control. Major production concepts of work flow, balancing, throughput, cycle time, work-in-process. Principal and application of Standard Minute Value (SMV) in cost and production planning. Optimization of production scheduling and capacity planning. Quality aspects, measurements of final products in mass manufacturing. (III) Trade & Shipping Formalities Contract formation and provisions; Financing methods and transaction settlement; Shipping formalities, procedures, freight cost management, rules and regulations																																								
Teaching/Learning Methodology	Lectures will be designed to provide the general framework and operations of merchandising and various apparel production processes. Guest seminars will provide students with first-hand knowledge in merchandising practices and handling technical problems in specific production processes. Tutorials will be used to supplement formal lectures and seminars for further exploration of concepts and principles. Students will be confronted with real life problems in globally oriented merchandising and production tasks.																																								
Assessment Methods in Alignment with Intended Learning Outcomes	<table><tr><th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="4">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th></tr><tr><th>a</th><th>b</th><th>c</th><th>d</th></tr><tr><td>Continuous Assessment</td><td>50%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td></tr><tr><td><i>1. 	Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: The assessments will include knowledge building worksheet and a group project that assesses students' abilities to explore and integrate the merchandising and production processes, tackle real-life problems in the fast changing fashion market. The in-class discussion during tutorials will provide students a better understanding of the work-based environment and real-life problem scenarios in the production processes. Students' performance in terms of problem-solving techniques, critical thinking and analytical skills to be applied in the industry will also be assessed by written examination.	
Student Study Effort Expected	Class contact:	
	• Lecture	26 Hrs.
	• Tutorial	12 Hrs.
	Other student study effort:	
	• Projects	67 Hrs.
	Total student study effort	105 Hrs.
