

Subject Description Form

Please read the notes at the end of the table carefully before completing the form.

Subject Code	SFT345AF
Subject Title	AI in Fashion Integrated Marketing Communications
Credit Value	3
Level	3
Pre-requisite/ Co-requisite/ Exclusion	Nil
Objectives	Students will learn the fundamental concepts, theories, and importance of integrated marketing communications (IMC) within the fashion industry. This subject will also focus on the use of AI in crafting marketing communication messages and advertisements. Students will be required to apply AI tools to creatively design and develop an IMC plan for a fashion enterprise.
Intended Learning Outcomes <i>(Note 1)</i>	Upon completion of the subject, students will be able to: (a) acquire a comprehensive understanding of the principles, theories, and strategies involved in fashion IMC; (b) explore the characteristics of different IMC tools; (c) discuss emerging issues and challenges, especially the use of AI, in fashion marketing communications; (d) identify opportunities and challenges faced by fashion companies and develop an IMC plan by using AI tools; (e) demonstrate effective teamwork and professional communication skills.
Subject Synopsis/ Indicative Syllabus <i>(Note 2)</i>	(I) Introduction to IMC • Overview of fashion IMC, its role and importance • The components of IMC • Roles of different specialized services agencies in supporting fashion promotion (II) Planning and Process Models in Communication • The planning and response process in communication • The communication model • The source factors and message structure (III) IMC Programmes in the Fashion Industry • Value and ways of setting objectives • Budget estimation and allocation

	• The IMC tools, advertising planning and media consideration (IV) AI in Fashion IMC • Role of AI in fashion IMC • Overview and the use of different AI tools • The emerging trend, challenges and ethical consideration of applications of AI in fashion IMC																																								
Teaching/Learning Methodology <i>(Note 3)</i>	Lecture/seminars: In the lecture, theoretical concepts, and case examples, will be used to enrich the students’ understanding on this subject. Tutorials: Case studies and group discussion will be used in tutorials to strengthen the learning.																																								
	<table><tr><th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="5">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th></tr><tr><th>a</th><th>b</th><th>c</th><th>d</th><th>e</th></tr><tr><td>Continuous Assessment</td><td>50%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td></tr><tr><td>Group project</td><td>50%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td></tr><tr><td>Examination</td><td>50%</td><td>✓</td><td>✓</td><td>✓</td><td></td><td></td></tr><tr><td>Total</td><td>100 %</td><td colspan="5"></td></tr></table> Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: Group project is designed to offer students an opportunity to apply theories and concepts within the context of the real-world fashion industry. Students are expected to identify opportunities or challenges of a fashion enterprise, establish clear objectives and develop an IMC plan with the consideration of budget allocation. This project requires students to present their idea and submit a report. Students are allowed to use Generative AI tools in designing the promotional messages and advertisements in their IMC plan. They can also employ AI tools to refine their English writing and improve clarity in their reports. However, they are required to provide a clear declaration detailing which Generative AI tools were used and how they were utilized. Failure to comply with this declaration may result in disciplinary action. Note 1: Intended Learning Outcomes

Intended learning outcomes should state what students should be able to do or attain upon subject completion. Subject outcomes are expected to contribute to the attainment of the overall programme outcomes.

Note 2: Subject Synopsis/Indicative Syllabus

The syllabus should adequately address the intended learning outcomes. At the same time, overcrowding of the syllabus should be avoided.

Note 3: Teaching/Learning Methodology

This section should include a brief description of the teaching and learning methods to be employed to facilitate learning, and a justification of how the methods are aligned with the intended learning outcomes of the subject.

Note 4: Assessment Method

This section should include the assessment method(s) to be used and its relative weighting, and indicate which of the subject intended learning outcomes that each method is intended to assess. It should also provide a brief explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes.
