

Subject Description Form

Subject Code	SFT417CP
Subject Title	Capstone Group Project by Thesis
Credit Value	5
Level	4
Pre-requisite/ Co-requisite/ Exclusion	Pre-requisite: SFT333CP Professional Language Skills and Project Preparation (by Thesis) Exclusion: SFT415CP Capstone Project by Thesis and SFT416CP Capstone Project by Collection
Objectives	The subject nurtures imaginative ideas and creativity in students who explore a real-life problem, experience the design process, experiment and search for solutions based on what they have learnt. Students are encouraged to think and work independently under the mentorship of academic supervisors.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: (a) apply an analytical, critical and creative approach to identify and define a problem which needs to be solved in the fashion industry; (b) prepare a project proposal which contains realistic and preferably strategic objectives to tackle a real-life problem, and which clearly outlines the methodology to be followed; (c) undertake and complete the planned project work within the time frame successfully; (d) systematically capture, critically analyse, interpret and write up, in the form of a report. (e) develop and competently deliver a convincing and professional presentation in a clear, systematic and scientific manner. (f) work as a team in organisation and presentation of the project
Subject Synopsis/ Indicative Syllabus	A Final Year Project resulting in a thesis submission is required by the BA (Hons) in Fashion; and specialisms in <i>Fashion Innovation and Technology</i>, and <i>Fashion Business</i>. Each student is required to carry out a piece of academic work independently, and a report will be written up providing an accurate account of the project. The subject or the contents of the project should focus on a real-life problem with clear objectives. Students form small groups (in group size of 3-4 students) and undertake an independent project under the

	guidance of a project supervisor. The guidance may take the form of regular meeting, laboratory sessions, tutorials and/or consultations. The nature of the project should contribute to advancement of knowledge, problem solving or understanding nature of a specific sector, company or brand in the fashion industry. Originality of the work and academic rigour essentially account for the quality of the Capstone Project. The project work thus will require an in-depth understanding and analysis of the real-life problem for solutions. Apart from the Capstone project report, student is required to make a comprehensive oral presentation and an oral defence of the project.																																																																																						
Teaching/Learning Methodology	Regular individual/ group consultations should be held between students and the project supervisors. As part of the monitoring system, progress reports are required to be submitted on specific dates as announced by SFT General Office.																																																																																						
Assessment Methods in Alignment with Intended Learning Outcomes	<table><tr><th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="6">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th></tr><tr><th>a</th><th>b</th><th>c</th><th>d</th><th>e</th><th>f</th></tr><tr><td>Continuous assessment</td><td>100%</td><td></td><td></td><td></td><td></td><td></td><td></td></tr><tr><td>1. Students’ analytical and critical skills, creativity and problem solving techniques demonstrated during the processes will also be assessed. Students’ ability to systematically capture, critically analyse, interpret and write up, in the form of a thesis, present the conclusions and recommendation based on the findings generated	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)						a	b	c	d	e	f	Continuous assessment	100%							1. 	from the project, as well as the originality of the work, will be assessed. <u>Deliverables by Group</u> Project preparation and progress report (at group basis) through continuous assessment with regard to active participation and critical analysis of students to achieve intended learning outcomes (a-b). Project presentation (at group basis) through an oral presentation upon completion of the project report to achieve intended learning outcomes (c-f). During the project presentation, each group member is required to present the project of his/her contribution and respond to the questions addressed to him/her by the assessment panel. Each group member is required to specify his/her own contribution in the report. Individual contribution and performance of each student in performing the project will be assessed below. <u>Deliverables by Individual Student</u> Project report and individual assessment (through a viva examination) to achieve intended learning outcomes (c-f). Peer assessment – achieve intended learning outcomes (c-e) through critical appraisal by other students. In case of an industry-based project, comments will also be invited from the industry supervisor but s/he will not be required to perform the formal assessment.	
Student Study Effort Expected	Class contact:	
	• Tutorial	0 Hrs.
	Other student study effort:	
	• Assignments/ Individual/ group consultations	196 Hrs.
	Total student study effort	196 Hrs.
