

The Hong Kong Polytechnic University

Subject Description Form

Please read the notes at the end of the table carefully before completing the form.

Subject Code	SFT517
Subject Title	Essential Tailoring Techniques and Stitches
Credit Value	3
Level	5
Pre-requisite/ Co-requisite/ Exclusion	Nil
Objectives	This subject has the following objectives: 1. Introduction to the art of tailoring techniques and processes. 2. Learn to use appropriate hand and machine tools for tailoring. 3. Understanding relevant fabrics and materials for tailoring construction. 4. Explore garment construction methods and finishing techniques.
Intended Learning Outcomes <i>(Note 1)</i>	Upon completion of the subject, students will be able to: a) Understand the appropriate use of tailoring tools and equipment. b) Use tailoring techniques for high-quality garment construction, finishing and fit. c) Use tailoring techniques and materials for the interior support and finishing of a garment. d) Know the hand and machine stitches for the appropriate functional and decorative seams and finishes.
Subject Synopsis/ Indicative Syllabus <i>(Note 2)</i>	In this course students explore a wide range of tailoring techniques and stitches including fabric preparation, garment construction and finishing details. Topics covered in the lectures could include: 1. Introduction to tailoring and sewing tools and equipment. 2. Understanding the elements of a tailored garment.

	3. Choosing the appropriate fabrics and materials for the garment's exterior and interior. 4. Garment Construction Techniques a. Shoulder construction b. Collars/lapels c. Canvas, interfacing d. Fit 5. Tailoring finishing techniques. a. Linings, hem weights b. Decorative finishes and binding c. Bound buttonholes 6. Pressing techniques a. Pressing tools and equipment b. Moulding and shaping c. Delicate and challenging fabrics Video demos include: 1. Various hand and machine stitches 2. Garment construction 3. Finishing techniques (hand and machine) 4. Fit analysis 5. Pressing tools and techniques The students will complete weekly exercises, assignments as well as finished projects. Online Discussions and Critiques will allow students to engage in group discussions, sharing research ideas, exercises and assignments as well as finished projects. Assignments include constructing samples, garment parts and a full garment.
Teaching/Learning Methodology <i>(Note 3)</i>	This online course consists of lectures that provide key knowledge delivery in theory, concepts and process. Video demonstrations provide a step-by-step guide to technical skills with exercises for students to practise and perfect the skills. Faculty moderated discussions and critiques provide a group learning environment for students to share, learn and be inspired by each other. Weekly assignments and design projects are assessed to provide individualised feedback by the faculty.

Assessment Methods in Alignment with Intended Learning Outcomes (Note 4)	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)					
			a	b	c	d		
	1. Participation (discussions, critiques, group activities etc.)	10%	✓	✓	✓	✓		
	2. Exercises	20%	✓	✓	✓			
	3. Weekly Assignments	30%		✓	✓	✓		
	4. Design Projects	40%			✓	✓		
	Total	100 %						
Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: <u>Participation 10%</u> Participation includes class discussions, shared discoveries, class critiques and feedback, presentations etc. Interaction in an online platform is important for engagement and sharing ideas to motivate and inspire each other. <u>Exercises 20%</u> Exercises are given to learn and practice new tools, processes and techniques, to gain a level of confidence to explore creatively. Assessment of weekly exercises and assignments will help to improve the student’s level of proficiency in the given medium. <u>Weekly Assignments 30%</u> Weekly assignments allow the students to learn new skills and to get constructive feedback to develop proficiency. <u>Design Projects 40%</u> Design projects allow the students to explore and stretch their creativity to synthesize and contextualize the different skills they have learned into a creative and unique project.								
Student Study Effort Expected	Class contact:							
	▪ Presentations and Demos						26 Hrs.	

	▪ Discussions and Critiques	13 Hrs.
	Other student study effort:	
	▪ Exercises	19.5 Hrs.
	▪ Self-study/ Completing Assignments	46.5 Hrs.
	Total student study effort	105 Hrs.

Note 1: Intended Learning Outcomes

Intended learning outcomes should state what students should be able to do or attain upon subject completion. Subject outcomes are expected to contribute to the attainment of the overall programme outcomes.

Note 2: Subject Synopsis/Indicative Syllabus

The syllabus should adequately address the intended learning outcomes. At the same time, overcrowding of the syllabus should be avoided.

Note 3: Teaching/Learning Methodology

This section should include a brief description of the teaching and learning methods to be employed to facilitate learning, and a justification of how the methods are aligned with the intended learning outcomes of the subject.

Note 4: Assessment Method

This section should include the assessment method(s) to be used and its relative weighting, and indicate which of the subject intended learning outcomes that each method is intended to assess. It should also provide a brief explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes.
