

The Hong Kong Polytechnic University

Subject Description Form

Please read the notes at the end of the table carefully before completing the form.

Subject Code	SFT520E
Subject Title	Leatherwork Essentials
Credit Value	3
Level	5
Pre-requisite/ Co-requisite/ Exclusion	Nil
Objectives	This subject has the following objectives 1. Preparatory course for Italy term. 2. Provide an overview and introduction to leather processing, design and production. 3. To understand correct leather terminology, qualities and design applications. 4. To explore basic hand leather tools, techniques and designs.
Intended Learning Outcomes <i>(Note 1)</i>	Upon completion of the subject, students will be able to: a) Understand the basic theories of leather design and production. b) Have the ability to identify leather names, qualities and their applications. c) Apply basic leather working techniques including fundamental patternmaking concepts and basic stitches and finishing using hand tools. d) Design and construct with leather (embellishments, trims etc.).
Subject Synopsis/ Indicative Syllabus <i>(Note 2)</i>	This introductory elective will prepare students for the Italy term courses in Artisan Design & Production's leatherwork module and Capstone Project should they decide to incorporate leather into their final collection. The course provides a basic understanding of leatherwork including concepts, processes and terminology, identifying material qualities, hand tools and basic stitching and finishing techniques, and design applications. Topics covered in the lectures could include: 1. Introduction to the history and concepts of leather design.

	- Overview and analysis of contemporary leather designs. - Understanding raw material production, terminology and identifying leather qualities. - Overview of the basic hand and machine tools used in leatherwork and their applications. - The differences between fabric vs. leather patternmaking and construction. - Design Planning - How to select the appropriate materials - Full leather vs. mixing materials - Technical considerations Video demos include: - Developing a simple leather pattern. - How to use basic leatherwork hand tools and safety guidelines. - Basic leather cutting, stitches and finishing. Exercises: The students will complete weekly exercises to practice using the tools and techniques (cutting, stitching etc.). Online Discussions & Critiques will allow students to engage in group discussions, and share research and ideas, exercises, assignments as well as finished projects. Assignments include research and development of design concepts, sketch booking, design planning and constructing designs that use or incorporate leather.						
Teaching/Learning Methodology <i>(Note 3)</i>	This online course consists of lectures that provide key knowledge delivery in theory, concepts and process. Video demonstrations provide a step-by-step guide to technical skills with exercises for students to practice and perfect the skills. Faculty moderated discussions and critiques provide a group learning environment for students to share, learn and be inspired by each other. Weekly assignments and design projects are designed to promote skills development and proficiency in the medium.						
Assessment Methods in Alignment with Intended Learning Outcomes <i>(Note 4)</i>	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)				
			a	b	c	d	
	1. Participations (discussions, critiques, group activities etc.)	15%	✓	✓	✓	✓	
	2. Exercises	20%	✓	✓	✓	✓	

	3. Weekly Assignments	30%	✓	✓	✓	✓		
	4. Design Projects	35%	✓	✓	✓	✓		
	Total	100 %						
	Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: <u>Participation 15%</u> Participation includes class discussions, shared discoveries, class critiques and feedback, presentations etc. Interaction in an online platform is important for engagement and sharing ideas to motivate and inspire each other. <u>Exercises 20%</u> Exercises are given to learn and practice new tools, processes and techniques, to gain a level of confidence to explore creatively. Assessment of weekly exercises and assignments will help to improve the student's level of proficiency in the given medium. <u>Weekly Assignments 30%</u> Weekly assignments allow the students to learn new skills and to get constructive feedback to develop proficiency. <u>Design Projects 35%</u> The course projects will help the student explore and stretch their creativity to synthesize and contextualize the different artisan skills they have learned into a creative and unique concept. The projects could also contribute fresh ideas or techniques to the student's capstone project.							
Student Study Effort Expected	Online class contact:							
	▪ Presentations and Demos						26 Hrs.	
	▪ Discussions and Critiques						13 Hrs.	
	Other student study effort:							
	▪ Exercises						19.5 Hrs.	
	▪ Self-study and Completing Assignments						46.5 Hrs.	
	Total student study effort						105 Hrs.	

Reading List and References	TBD	
------------------------------------	-----	--

Note 1: Intended Learning Outcomes

Intended learning outcomes should state what students should be able to do or attain upon subject completion. Subject outcomes are expected to contribute to the attainment of the overall programme outcomes.

Note 2: Subject Synopsis/Indicative Syllabus

The syllabus should adequately address the intended learning outcomes. At the same time, overcrowding of the syllabus should be avoided.

Note 3: Teaching/Learning Methodology

This section should include a brief description of the teaching and learning methods to be employed to facilitate learning, and a justification of how the methods are aligned with the intended learning outcomes of the subject.

Note 4: Assessment Method

This section should include the assessment method(s) to be used and its relative weighting, and indicate which of the subject intended learning outcomes that each method is intended to assess. It should also provide a brief explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes.
