

The Hong Kong Polytechnic University

Subject Description Form

Please read the notes at the end of the table carefully before completing the form.

Subject Code	SFT521E
Subject Title	Couture Embellishment
Credit Value	3
Level	5
Pre-requisite/ Co-requisite/ Exclusion	Nil
Objectives	This subject has the following objectives: 1. Provide an overview and introduction to couture embroidery and embellishment techniques. 2. Understand materials and equipment used in couture hand embroidery. 3. To understand couture embroidery techniques, processes and design applications.
Intended Learning Outcomes <i>(Note 1)</i>	Upon completion of the subject, students will be able to: a) Understand the theories and practices involved in hand embroidery. b) Ability to name hand embroidery materials, equipment, techniques and processes. c) Design couture hand embroidery and embellishment samples. d) Apply skills to produce advanced, industry-standard hand embroidery samples.
Subject Synopsis/ Indicative Syllabus <i>(Note 2)</i>	This course provides an in-depth, industry-standard understanding of couture hand embroidery and embellishment techniques including concepts, processes and terminology, identifying material qualities, equipment and tools, and hand finishing techniques and contemporary design applications. Topics covered in the lectures could include: 1. Introduction to the history and concepts of couture hand embroidery, an exploration of the difference between couture hand embroidery and standard embroidery 2. Overview and analysis of couture hand embroidery

	3. Overview of hand embroidery materials and equipment 4. How to design for couture hand embroidery a) selecting materials b) combining techniques c) technical considerations Video demos include: 1. Framing up for embroidery - (how to set up a slate frame vs how to set up a seat frame) 2. Transferring your design onto your fabric (tracing vs prick and pounce) 3. Tambour Beading a) Understanding how to use a Tambour Hook b) Decorative Tambour Stitching c) Attaching Beads d) Attaching Sequins e) Vermicelli Stitching 4. Hand Embellishment a) How to start and finish your thread for couture work b) 3D hand beading techniques c) Decorative 3D Goldwork embroidery techniques d) Using combinations of materials to produce 3D embroidery techniques 5. Silk Thread and Stranded Cotton work a) Preparing your fabric for silk thread work with Split Stitch b) Padding with thread c) Silk Thread work d) Long and Short Silk Painting Exercises: The students will complete weekly exercises, assignments as well as finished projects. Online Discussions and Critiques will allow students to engage in group discussions, sharing research ideas, exercises and assignments as well as finished projects. Assignments include research and development of design concepts, hand embroidery sampling and construction finished samples incorporating couture hand embroidery techniques.
Teaching/Learning Methodology <i>(Note 3)</i>	This online course consists of lectures that provide key knowledge delivery in theory, concepts and process. Video demonstrations provide a step-by-step guide to technical skills with exercises for students to practise and perfect the skills. Faculty moderated discussions and critiques provide a group learning environment for students to share, learn and be inspired by each other. Weekly assignments and design projects are assessed to provide individualised feedback by the faculty.

Assessment Methods in Alignment with Intended Learning Outcomes (Note 4)	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)					
			a	b	c	d		
	1. Participation (discussions, critiques, group activities etc.)	10%	✓	✓	✓	✓		
	2. Exercises	20%			✓	✓		
	3. Weekly Assignments	30%			✓	✓		
	4. Design Projects	40%	✓	✓	✓	✓		
	Total	100 %						
	Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes:							
	<u>Participation 10%</u>							
	Participation includes class discussions, shared discoveries, class critiques and feedback, presentations etc. Interaction in an online platform is important for engagement and to share ideas to motivate and inspire each other.							
	<u>Exercises 20%</u>							
	Exercises are given to learn and practice new tools, processes and techniques, to gain a level of confidence to explore creatively. Assessment of weekly exercises and assignments will help to improve the student’s level of proficiency in the given medium.							
	<u>Weekly Assignments 30%</u>							
	Weekly assignments allow the students to learn new skills and to get constructive feedback to develop proficiency.							
	<u>Design Projects 40%</u>							
	Design projects allow the students to explore and stretch their creativity to synthesize and contextualize the different skills they have learned into a creative and unique project.							
Student Study Effort Expected	Class contact:							
	▪ Presentations and Demos						26 Hrs.	
	▪ Discussions and Critiques						13 Hrs.	

	Other student study effort:	
	▪ Exercises	19.5 Hrs.
	▪ Self-study/ Completing Assignments	46.5 Hrs.
	Total student study effort	105 Hrs.
Reading List and References	TBD	

Note 1: Intended Learning Outcomes

Intended learning outcomes should state what students should be able to do or attain upon subject completion. Subject outcomes are expected to contribute to the attainment of the overall programme outcomes.

Note 2: Subject Synopsis/Indicative Syllabus

The syllabus should adequately address the intended learning outcomes. At the same time, overcrowding of the syllabus should be avoided.

Note 3: Teaching/Learning Methodology

This section should include a brief description of the teaching and learning methods to be employed to facilitate learning, and a justification of how the methods are aligned with the intended learning outcomes of the subject.

Note 4: Assessment Method

This section should include the assessment method(s) to be used and its relative weighting, and indicate which of the subject intended learning outcomes that each method is intended to assess. It should also provide a brief explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes.
