

The Hong Kong Polytechnic University

Subject Description Form

Please read the notes at the end of the table carefully before completing the form.

Subject Code	SFT523E
Subject Title	Contemporary Passementerie Design
Credit Value	3
Level	5
Pre-requisite/ Co-requisite/ Exclusion	Nil
Objectives	This subject has the following objectives: 1. Provide an overview and an introduction to contemporary passementerie for fashion design. 2. To understand correct passementerie terminology, qualities and design applications. 3. Enable students to learn a range of fundamental passementerie-making techniques and how these can be applied within fashion design.
Intended Learning Outcomes <i>(Note 1)</i>	Upon completion of the subject, students will be able to: a) Understand the introductory principles of handmade passementerie design and creation. b) Apply the correct passementerie terminology, tools and processes. c) Design and construct passementerie using a range of textile processes, techniques and materials. d) Understand and creatively demonstrate how passementerie can be used and applied within contemporary fashion design.
Subject Synopsis/ Indicative Syllabus <i>(Note 2)</i>	This course provides an introductory understanding of how to design and create handmade, contemporary passementerie embellishments for fashion design. This course will provide students with a solid overview of theories & concepts, terminology, identifying techniques and material qualities, tools, hand textile-making techniques and processes, finishing techniques and design applications.

	Exploration of materials, techniques, scale and application (as relevant to the student's interests) will be strongly encouraged throughout the course. Topics that could be covered through lectures: 1. What is passementerie? An introduction to the craft and concept of passementerie through both a historical and contemporary viewpoint. 2. Overview and analysis of contemporary passementerie within fashion design. 3. Types of passementerie and how they are made (including woven, knotted, braided, embroidered, spun). 4. Design planning – How to work with a colour and texture palette, how to select appropriate materials, how to select making methods, and technical considerations. Video demonstrations could include: Most techniques only require readily available materials & equipment. More specialist equipment (e.g. simple frame loom) can be readily purchased or made easily at home. 1. How to weave passementerie using a simple frame loom: 1a: How to weave braids 1b: How to weave fringes 2. Techniques for making materials: 2a: How to make cords 2b: Braiding techniques 2c: Plaiting techniques 3. Colour and material matching to fabric. 4. Tassel making. 5. Button making. 6. Frogging and other fancy applied passementerie techniques Online discussion & critiques: These will enable students to engage in group discussions and share research and ideas, exercises, assignments as well as finished projects.
--	---

	Exercises: The students will complete weekly exercises to practice using the tools and techniques. Assignments: Include research and development of ideas and design concepts, sketchbook work, design planning, exploration of techniques and materials, and constructing passementerie samples.																																																						
Teaching/Learning Methodology (Note 3)	This online, asynchronous course consists of lectures that provide key knowledge delivery in theory, concepts, making processes and materials concerning the use of Passementerie within contemporary couture fashion design. Video demonstrations provide a step-by-step guide to technical skills with clear exercises for students to practice and perfect the skills. Faculty moderated discussions and critiques provide a group-learning environment for students to learn, share and be inspired by each other. Weekly assignments and design projects are assessed to provide individualized feedback by the faculty.																																																						
Assessment Methods in Alignment with Intended Learning Outcomes (Note 4)	<table><tr><th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="6">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th></tr><tr><th>a</th><th>b</th><th>c</th><th>d</th><th></th><th></th></tr><tr><td>1. 	inspire each other. <u>Exercises 20%</u> Exercises are given to learn and practice new tools, processes and techniques, to gain a level of confidence to explore creatively. Assessment of weekly exercises and assignments will help to improve the student's level of proficiency in the given medium. <u>Weekly Assignments 30%</u> Weekly assignments allow the students to learn new skills and to get constructive feedback to develop proficiency. <u>Design Projects 40%</u> Design projects allow the students to explore and stretch their creativity to synthesize and contextualize the different skills they have learned into a creative and unique project.	
Student Study Effort Expected	Online class contact:	
	▪ Lecture and demonstrations	26 Hrs.
	▪ Discussion & critiques	13 Hrs.
	Other student study effort:	
	▪ Exercises	19.5 Hrs.
	▪ Self-study and completing assignments	46.5 Hrs.
	Total student study effort	105 Hrs.

Note 1: Intended Learning Outcomes

Intended learning outcomes should state what students should be able to do or attain upon subject completion. Subject outcomes are expected to contribute to the attainment of the overall programme outcomes.

Note 2: Subject Synopsis/Indicative Syllabus

The syllabus should adequately address the intended learning outcomes. At the same time, overcrowding of the syllabus should be avoided.

Note 3: Teaching/Learning Methodology

This section should include a brief description of the teaching and learning methods to be employed to facilitate learning, and a justification of how the methods are aligned with the intended learning outcomes of the subject.

Note 4: Assessment Method

This section should include the assessment method(s) to be used and its relative weighting, and indicate which of the subject intended learning outcomes that each method is intended to assess. It should also provide a brief explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes.
